and the

## SOUTH AUSTRALIAN SPATIAL EXCELLENCE AWARDS

Adelaide Convention Centre | FRIDAY 5 AUGUST 2011

### Spatial Information Day 2011 Abstract

**Title:** GIS on the Move – mobile GIS  
**Session:** 10 – Geography on the move  
**Author:** Gordon Sumerling  
**Presenter:** Gordon Sumerling – Esri Australia

**Abstract:**

What can't you do with a Smartphone and who doesn't own one? Smartphone technologies and the applications which drive them are no longer recreational items but are tools which are changing the way organisations resource their workforce. GIS functions are no longer performed solely on the desktop but are embedded in workflows connecting the desktop to the field and to the customer. This presentation explores how Smartphone applications are adding another dimension to GIS, making geography normal.
